

## Swivels

2800 bar | 40 LPM

PRO-JETTING rotary couplings are crucial for the safety and ease of use of the sprayer with ultra high pressure water jets and cleaning. These swivels ensure that the sometimes stiff hoses can twist so that there is less tension on the hose, which increases the service life. Swivel couplings are available up to 2800 bar with various couplings and designs.

## Specifications

**Pressure:** Max. 2800 bar (41.000 psi)

**Flow:** max. 40 LPM (10,6 gpm)

**Material:** RVS

**Connection:** M26x1,5 - 3/4" UNF

**Application:** Increase the freedom of movement and comfort of the sprayer

## Features

- High quality materials
- Compact and light weighted
