

Hotbox

500 bar | 11 - 35 LPM | 35 - 110°C

Compact, easy to operate and uses hot water. Because you can set the temperature manually, this unit is suitable for any stubborn application.

Specifications

Pressure: 200 - 500 bar

Flow: 11 - 25 LPM

Degrees Celsius: 110 °C

Drive: Electric - Diesel

Fuel Tank: 20 liter

(L x W x H) cm: 76 x 77 x 96

Weight: 110 - 120 kilo

Applications: Industrial cleaning, graffiti removal, roads and ships cleaning

Features

- High effectiveness in removing oil, grease and other stubborn substances.
- Convert your current high pressure units to hot water units. (5 - 500 bar)
- Electronic temperature controller with constant water temperature
- Simple operation and maintenance.
- High efficiency and low NOx emissions.
- Accelerates the cleaning process and saves time and costs.
- High quality, long life and economically justified purchase price.
- Fuel tank with level indicator.
- Professional safety valve
- Thermal protection of the boiler
