

Orbital nozzles

Max. 2500 bar

2500 bar orbital rotating nozzles for water jetting, surface cleaning and the removal or stripping of coatings, asphalt, concrete or rubber up to 2500 bar.

Specifications

Pressure : Max. 2500 bar (36,000 psi)

Temperature: Max. 100 ° C

Rotor: 0.60 – 2.80 mm

Features

- High cleaning capacity
- Constant blast flow
- High durability
- Easy to install and disassemble
- Easy to maintain
- Good price-performance ratio
