

Short Cavitation Cleaning Gun

CW200 - max. 90 N reaction force

The CW200 short cavitation cleaning gun helps yacht owners and commercial divers remove light to medium biological growth from ship hulls, propellers, thrusters, rudders and underwater structures with total conservation of coatings. The compact gun with ergonomic trigger and short cavitation lance can be used with up to 28 LPM or 300 bar with a maximum reaction force of 90N.

Specifications

Compatible with: HDE120_11,
HDE170_33, HDMP150_13,
HDMD150_15, HDMD170_21

Minimum pressure: 120 bar (1,740 psi)

Maximum pressure: 300 bar (4,350 psi)

Reaction force: Max. 90 N

Minimum flow: 11 LPM (2.9 GPM)

Maximum flow: 28 LPM (7.5 GPM)

Lance length: 230mm (9")

Retro lance length: n/a

Weight: 1100g (2.4lbs)

Weight under water: 600g (1.3lbs)

Features

- Improved cavitation technique
- Intensity adjustable with high-pressure unit
- Durable, salt water resistant materials
- Double-walled stainless steel lance
- Tapered lance tip with visible cover ring
- Ergonomic controls
- Large control lever with "Safety catch"
- Swiveling connection
- Use with single neutrally buoyant high-pressure hose
