

Diesel High Pressure Unit

15 LPM @ 150 bar

The diesel engine driven HDMD150_15 high pressure unit is compact and economic for cavitation cleaning. The 15 LPM @ 150 bar, stand-alone unit is built as a cart with pump, engine, diesel tank and detergent tank for cleaning the deck with a regular high pressure gun. The HDMD150_15 is compatible with the CW200 short gun and CW300 long gun for removing light fouling from hulls and propellers.

Specifications

Compatible with: CW200, CW300

Max. Pressure: 150 bar (2,175 psi)

Max. flow: 15 LPM (4 GPM)

Power: 7,5HP Yanmar diesel engine

Weight: 60kg (132 lbs)

Dimensions: 62x116x71cm
(24.4x45.7x28")

Features

- Removes light fouling from hulls, propellers and underwater surfaces
- Detergent tank for deck cleaning with non cavitation gun
- Heavy duty, 4 wheeled cart
- Manual pressure valve
- Readily serviceable water filter
- No engine-oil safety device
- Motor thermal protection
