

## Diesel High Pressure Unit

60 LPM @ 200 bar

The diesel engine driven HDMD200\_60 high pressure unit is built as a solid skid with diesel engine and pump with stainless steel pump head for professional cavitation cleaning. The high water volume of 60 LPM results in fast cavitation cleaning of hulls and underwater surfaces with double CW350's, CW450, single or double Rotor Cleaners, all ROV lances and drives all underwater tools.

## Specifications

**Compatible with:** Triple CW300's, Double CW350's, CW450, CW202ROV, CW303ROV, All Rotor Cleaners, All Underwater Tools

**Max. Pressure:** 200 bar (2,900 psi)

**Max. flow:** 60 LPM (15.9 GPM)

**Power:** 35HP Kubota diesel engine

**Weight:** 740kg (1,631 lbs)

**Dimensions:** 160x123x113cm  
(63x48.4x44.5")

## Features

- Removes medium fouling, debris, corrosion and instable coatings
- Drives all underwater tools
- Stainless steel pump head
- Heavy duty skid
- Stainless steel cover
- Big cartridge filter at pump inlet
- Manual pressure valve
- Motor thermal protection
