

ROV Cavitation Cleaning

CW202 - CW303

The DiveWise Equipment CW202 and CW303 ROV lances are designed to retrofit almost any ROV on the market for cavitation cleaning to remove corrosion, coatings and thick layers of fouling, oysters and barnacles with water pressures up to 300bar (4,350 psi).

Specifications

Maximum pressure: 500 bar (7,250psi)

Minimum flow: 28 L/min. (7.5 GPM)

Maximum flow: 80 L/min. (21 GPM)

Features

- Easy and solid installation
- Improved cavitation technology
- Intensity adjustable with high-pressure unit
- Durable, salt water resistant materials
- Double-walled stainless steel lance
- Tapered lance tip with visible cover ring
- Single neutrally buoyant high-pressure hose required
- Retrolance straight behind cavitation lance

ROV Cavitation Lances

Product	Lance Length	Weight	Weight under water
CW202 ROV Lance	280mm	1,8kg (4lbs)	1kg (2.2lbs)
CW303 ROV Lance	680mm	2,3kg (5lbs)	1,2kg (2.6lbs)
