

## Underwater Drilling

### DR200 - DR300

DiveWise Equipment water hydraulic underwater tools are water driven and compatible with the same high pressure unit used for cavitation cleaning. The DR200 and DR300 underwater drills are connected via a single Neutrally Buoyant high pressure hose for drilling holes, brushing surfaces and polishing propellers.

## Specifications

**Compatible tools:** M14 thread and drill chuck

**Water pressure:** 150 - 300 bar (2,175 - 4,350 psi)

**Water flow:** 20-40 LPM (5.3 -10.6 GPM)

## Features

- Durable, salt water resistant materials
- Torque and speed adjustable with high-pressure unit
- Powerful and easy serviceable motor
- Ergonomic controls
- Large control lever with "Safety catch"
- Adjustable handle for second hand
- Single supply hose
- Optional: Rotation reversible

## Underwater Drills

Product	Max. Power	Max. RPM	Weight	Weight under water
DR200 Underwater Drill	3,000 W	15,000 rpm	2kg (4.5lbs)	1.5kg (3.4lbs)
DR300 Underwater Drill	6,000 W	4,000 rpm	3kg (6.6lbs)	2.2kg (4.8lbs)
